## CAREER OBJECTIVE

---

To secure a challenging position in a reputable organization to expand my learnings, knowledge, and skills. I aim to contribute to the growth of the company while enhancing my professional skills in a dynamic and stable workplace.

## PROJECT

---

Gold Price Prediction Using Machine Learning Algorithms: - Developing a machine learning model to predict gold prices, providing valuable insights to help individuals make informed decisions on when to buy, hold, or sell.

Ecommerce Website: -An eCommerce website built with JavaScript, Bootstrap, CSS, and HTML provides a responsive and interactive platform for online shopping. The website includes features like product listings, a shopping cart, user authentication, and a secure checkout process. Bootstrap ensures a mobile-friendly design, while JavaScript enables dynamic content updates and user interactions. CSS enhances the visual appeal, and HTML structures the web pages efficiently. This combination creates a seamless and engaging shopping experience for users.
